## Data Everywhere API

### Multiply the power of your data

Data Everywhere now further unlocks your spreadsheet data, allowing it to be accessed programmatically over our API. Display data from your feeds in mobile or web applications, or even update your data warehouse!

Our API provides programmatic access to view and edit all of your data feeds using simple, powerful, and secure interfaces.

### REST interface

The Data Everywhere API is a modern JSON REST API, providing the simplest and fastest access to your data. Alternatively, we are able to provide data in CSV format, as well.

### OAuth2 authentication

Data Everywhere is an OAuth 2.0 provider, which is a cutting edge protocol for authentication, allowing applications across any platform to easily and securely authenticate with Data Everywhere.

### Learn more

Contact us at [support@dataeverywhere.com](mailto:support@dataeverywhere.com) to learn more about getting documentation and access to our API.
